

AMENDMENTS TO THE SPECIFICATION:

Please amend the specification as follows:

Please delete the paragraph bridging pages 10 and 11.

Please add the following three new paragraphs after the full paragraph at page 10, *i.e.*, after line 17.

According to certain embodiments of the present invention, the at least one compound may be used in conjunction with at least one film-forming agent, such as, for example, film forming polymers and resins. For example, the film forming polymers may be chosen from cationic polymers, anionic polymers and nonionic polymers. Non-limiting examples of the at least one film forming agent are those listed at pages 1744 to 1747 of the CTFA International Cosmetic Ingredient Dictionary, 8th edition (2000).

In one embodiment, the at least one film forming agent may be chosen from water soluble compounds, oil soluble compounds and compounds soluble in organic solvents. According to the present invention, the at least one film forming agent may be present in an amount generally ranging from 0.01% to 30% of active material by weight relative to the total weight of the composition, such as from 0.1% to 10% of active material by weight. One of ordinary skill in the art will recognize that the at least one film forming agent according to the present invention may be commercially available, and may come from suppliers in the form of a dilute solution. The amounts of the at least one film forming agent disclosed herein therefore reflect the weight percent of active material.
